

SURASAK THEERATHONGDEE

Programmer

PROFILE

I had to work for a part-time job while I was studying. I worked at Paper lunch and Swensens after I finished the class. All of my free time was spent on my part-time job. Then, I joined an internship. I learning programming and develop program with python language, so the company hired me in part time job in programmer position after finished the internship program. I graduated with an Electrical Engineering degree but I like programming so I need to work as a programmer.
